thermal insulation

AWAKEN THE POTENTIAL IN YOU

An «ice bath» is a recovery technique that involves immersing the body in water below 15°C to harness the body's natural healing capacities.

Sport | Rehabilitation | Wellness | Rituals

BENEFITS FOR BODY AND MIND

ICE BATH

OUR CONCEPT

We offer you a complete range of Ice Bath 2.0 that will make the use of Ice cubes obsolete.

spa - 4 seats

Temperature
from 3°C to 42°C

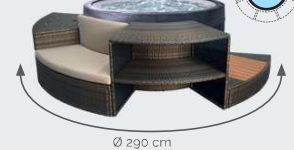

Control via Wi-Fi
connection

No more
ice cubes

Available with furniture
5 modules

The end of ice cubes

No more ice waste and constant water renewal. The Netspa Ice allows you to maintain and filter cold water up to 3°C at a low cost.

Control the temperature from 3 to 42°C

You can perfectly control your sessions according to the desired temperature. A detail that is important for precise training in complete safety.

Optimal insulation

Thanks to the foam in the walls of the Vita, the temperature will stay cool for a longer time.

An individual or collective concept

With its large capacity, you can enjoy a bath alone or with others after your workouts or sports activities.
